About SPACE

SPACE Landscape Construction is a commercial landscaping company based in South Australia. SPACE delivers large-scale Commercial landscape construction projects for developers, builders, councils, and civil clients.

SPACE have been in business for over 10 years and have experienced strong growth in recent years, with over 70 staff, and they continue to expand as they take on larger and more complex projects.

How long have you worked with YSL?

Our relationship with YSL spans more than a decade. Andrew Mattner has worked with us since before we started our business and was integral in helping us plan and develop the initial stages, ensuring the business was set up for success. For the past seven years, I've also worked closely with Daniel, who has been consistently helpful, responsive, and a trusted advisor to me.

What led you to start working with YSL?

Andrew has been with us from day one, helping us through the initial planning and setup of the business.

As things grew, we quickly realised we needed more than just an accountant, we needed someone who could help guide the business and support better decisions.

That's exactly what Andrew and his team have done, and they've been a big part of our growth journey.

What problems / projects have YSL helped you with?

YSL has supported us across a broad range of areas, including strategic planning, cash flow management, business structuring, and tax planning.

They've helped us build a clearer financial roadmap, improve our reporting and forecasting, and ensure our business structure is set up to support ongoing growth.

They've also been instrumental in helping us better understand our numbers, which has allowed us to make more confident and informed decisions.

What have been the results / how do you feel?

Since working with YSL, we feel far more confident in the direction of the business.

We have greater clarity around our financial position, improved control over cash flow, and a much stronger understanding of how to plan for growth.

It's given us a real sense of confidence and excitement about where the business is heading, knowing we have the right support behind us.

What is it like to work with YSL?

The team at YSL are highly responsive and genuinely invested in our business. They don't just provide advice, they roll up their sleeves and get involved when needed.

They take the time to understand what we're trying to achieve and are always thinking ahead, helping us identify opportunities and stay one step ahead.

They're also great to deal with, professional, down to earth, and enjoyable to work with.

What type of business would you recommend them to?

We would highly recommend YSL to any growing business, particularly those in construction or trade-based industries that are looking for more than just compliance accounting.

If you want a proactive partner who will help you understand your numbers, plan for growth, and genuinely support your business, YSL are an excellent choice.

Has your business outgrown your
accountant?
